BROCHURE

Invote Now *makes online voting:*

Efficient

- Off-the-shelf and ready to use
- Fully managed solution
- Instant and accurate results

Accessible

- Vote from any location, on any device, at any time
- Accessible to voters with disabilities
- Multi-lingual capabilities

Secure

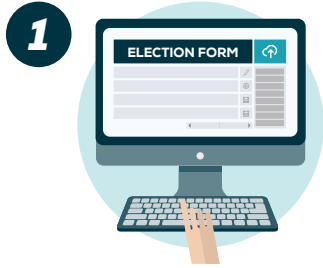

- Digitally signed ballots
- Encrypted from start to end
- Confirmation receipts

Main *benefits*

Invote Now **simplifies** the election process, **reduces** election costs, and **boosts turnout** by allowing voters to cast their ballots from any location, at any time, and on any internet connected device. The **off-the-shelf solution** prioritizes usability and comes ready to implement, ensuring an efficient election planning and voting process.

The online voting system suits any election type and accommodates **weighted voting** and voter roles. Results are immediately calculated after the election and are easily published online with intuitive graphics. Most importantly, InvoteNow keeps **security** a top priority, **encrypting** ballots from start to finish and always protecting voter privacy and anonymity.

How does it work?

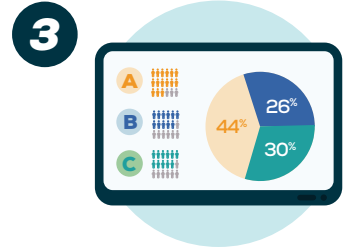

Prepare

A **project manager** sets everything up and shares a preview for your approval. Then, **credentials** are securely provided to voters so that they can log on to the voting portal.

Vote

Voters cast their ballots, which are encrypted directly on their devices to **prevent tampering**. They also receive a **confirmation receipt**. Updated **participation reports** are sent to officials on a daily basis.

Count

Once the election is over, the digital ballot box is mixed so that **votes and voters can never be matched**. From there, votes are decrypted, counted, and reported on for the final election results.

The cost

*Up to 70% savings and an average of 34% cost reduction when moving from traditional paper-based processes to modern, digital elections.**

*3-year Scytl customer average
